THE IMPORTANCE OF PUBLISHING GRADUATE WORKS

- Doctoral dissertations and master's theses are primary literature. They are valuable contributions to the discourse in every field of inquiry and to the culture of all creative fields.
- UMI-published dissertations and theses become part of the single most comprehensive collection of graduate-level creative work and research in the world.
- The UMI Collection is the safest, most sustainable repository for dissertations and theses, archiving this component of the primary literature in perpetuity.

For these reasons, and others important to the mission of your institution, publishing your dissertation or thesis with ProQuest Information and Learning's UMI® Dissertation Publishing is a graduation requirement in your program.

It is also in *your* best interests to publish your dissertation or thesis with ProQuest/UMI. You have many options for widely disseminating your published work, or restricting dissemination if that is in your best interests.

- Publishing your dissertation or thesis provides you with a legitimate citation for your curriculum vitae and for other scholars who refer to your work. Otherwise, scholarly convention requires that your work be listed as an "unpublished manuscript."
- Reference to your published dissertation or thesis appears in the world's most widely used sourceworks for graduate-level research, increasing the impact of your contribution to your field.
- You may also choose to make your work available to society, through open access publishing, ensuring that it is discoverable through major search engines, and through reliable third party retailers.

This document contains instructions on how to submit your manuscript and information about the dissemination options available to you, copyright issues, your rights as an author and our rights and obligations as your publisher, and a Publishing Agreement, which you must sign and provide to us along with your manuscript. PLEASE READ THIS INFORMATION so that your choices accurately reflect how you want ProQuest/UMI to manage your published work.

If you have questions that are not covered in this document, contact our Author Relations staff at disspub@il.proquest.com or call 1-800-521-0600, ext. 7020.

The Submission Process

STEP 1: Know your institution's submission procedures

Your institution's graduate school or its equivalent determines how your dissertation or thesis will actually be delivered to ProQuest/UMI. If your graduate school uses our ETD Administrator, you will be uploading your manuscript online and providing us with all necessary submission information via the web. If not, you will be filling out the paperwork in this document and providing it to us through your graduate school or library or other designated campus office.

STEP 2: Secure any necessary co-authorship and/or copyright permissions

If you share authorship with anyone else for any part of your dissertation or thesis, you need to acquire his or her permission to include that content. Likewise, if any content in your manuscript, including appendices, is already under another copyright, you need to acquire permission from the copyright holder to use that content. All such permissions must accompany your submission. See Guide 5 for more information, Guide 6 for a sample permission letter, and [Copyright Law & Graduate Research: New Media, New Rights, and Your New Dissertation](#) by Kenneth D. Crews for a comprehensive guide to copyright issues relative to your dissertation or thesis. You may view and/or download a free copy of Crews' book at www.proquest.com/products_umi/dissertations/copyright/. ProQuest/UMI may elect not to distribute your dissertation or thesis if, in its reasonable judgment, it believes all necessary rights of third parties have not been secured.

STEP 3: Read and understand the Licensing and Rights sections of the publishing agreement.

This agreement grants ProQuest/UMI the right to reproduce and disseminate your work according to the choices you make. This is a non-exclusive right; you may grant others the right to use your dissertation or thesis as well. You retain your copyright.

STEP 4: Choose your publishing option.

You may choose either open access or traditional publishing. If you choose Open Access Publishing, the published version of your dissertation or thesis will always be available for free download to anyone who has access to the Internet. The Traditional Publishing option works on a standard copy-sales and royalty-payments model. We sell copies of your work (in any format) and pay royalties as described in the Publishing Agreement. Either option gets your graduate research out where other scholars can find and use it through the ProQuest® Dissertations and Theses (PQDT) database, subscribed to by more than 3000 libraries worldwide.

In this step, you will also choose your options for release, dissemination and distribution, and restrictions. NOTE: your institution may require you to choose open access publishing and may have explicit policies regarding embargoes and restrictions. Check with your graduate school or program if you are not sure. Also see Guide 3: Open Access versus Traditional Publishing and Guide 4: Embargoes & Restrictions.

STEP 5: Sign the publishing agreement.

Publication of your work may be delayed or impossible if your signature is missing.

STEP 6: Provide your personal information, contacts, and degree data.

We require a limited amount of personal information to process your submission, provide records to your institution, and to communicate with you if necessary. We request your Country of Citizenship because libraries and researchers are often interested in searching for all dissertations published by authors of a given nation or region. We use your personal information solely for publishing and dissemination purposes, and do not sell or supply your personal information to any third party. The name you provide on the Submission Form should be identical to the name on your title page.

We know you are likely to relocate after you graduate. We ask for both your current contact information, and for permanent or stable contact information (e.g. your parents or another relative unlikely to move) to increase the chances of reaching you if there is an issue with your submission and to pay you royalties when/if you are eligible. If we are not able to reach you during the publishing process, the release of your dissertation or thesis and production of any print copies you order may be substantially delayed. If you have one, please provide us with your non-academic/non-professional email address; e.g. a hotmail-type web mail address.

Please use full and official names when completing the information about your university, school or college and department or program; e.g., The University of California at Berkeley, Graduate Division, Department of Integrative Biology. Please also use the correct abbreviation for the degree you earned. Finally, please provide the full name of your advisor/committee chair; e.g. James H. Smith, not Jim Smith.

STEP 6: Provide information about your dissertation or thesis.

We require this information to create the bibliographic data that establishes your dissertation or thesis in the primary literature. It is important that this information is accurate and corresponds precisely with the information in your manuscript. Discrepancies between the data you provide in this form and your manuscript can delay publication of your work and/or make it difficult for other researchers to discover your work.

Title

Make sure that the title you provide on the submission form is the same as the title on your manuscript's title page. For the sake of standardization, your title will appear in sentence case regardless of the conventions of your discipline; e.g., "The long and short of it: a sample title." Whenever possible, use full proper names of people, organisms, places, etc. For example: "Samuel Clemens" not "S. Clemens"; *Hyla arenicolor*, not *H. arenicolor*. Try to spell out abbreviations for specialized vocabulary; e.g., "Triassic" rather than "Tr." Use word substitutes for formulas, symbols, superscripts, subscripts, Greek characters, etc. For example, use "potassium", not "K"; "first", not "1st"; "delta", not "Δ". Be sure to include all appropriate accents and diacritical marks.

Subject Categories

The first (primary) subject category that you enter is the one under which your dissertation or thesis will occur in our citation and abstract indices. Using Guide 2, choose the category that most closely corresponds with the subject of your research. If you add one or two more subject categories, these will be associated with your work and may increase its exposure to search engines.

Keywords

Adding good keywords is another way to increase the chances that your work will be discovered. For example, geographic locations or specialized terms that do not occur in your title or abstract can increase exposure of your work.

STEP 7: OPTIONAL: Instruct us to file your application for copyright registration.

We can prepare and file the application to register your claim of copyright to your dissertation or thesis. You acquire copyright through the act of creating your manuscript, regardless of registering with the U.S. Copyright Office. A registered copyright, however, allows a court of law to award you monetary damages if your copyright is infringed. For more information, see the section on Copyright and Your Dissertation or Thesis.

STEP 8: OPTIONAL: Order copies.

You may order bound copies or microfiche of your dissertation or thesis at a discount. Your copies will be produced and shipped after the publication process is complete and your work is released for dissemination.

STEP 9: Make sure your manuscript is correctly organized

Follow your institution's guidelines for organization and required sections. Do NOT include the signature page in your submitted manuscript. This prevents a likeness of signatures from being distributed digitally.

STEP 10: Provide your dissertation or thesis.

Provide your manuscript and abstract in the form and format described in [Guide 1: Preparing Your Manuscript for Submission to ProQuest/UMI](#) to ensure that your manuscript will reproduce well in both print and microform. MAKE SURE all your fonts are embedded fonts. Guide 1 includes instructions on embedding fonts. Manuscripts without embedded fonts can cause ALL punctuation and formatting to disappear when the document is printed from the digital file and causes delays in our publishing process.

STEP 11: Attach Pages 3 and 4 (Agreement signature page and Submission Form page) to your manuscript and submit according to your institution's instructions.

SUBMISSION CHECKLIST

<input type="checkbox"/> Is your full name on the title page of the work, the abstract, and the submission form? Are all three identical? (If not, we will use the name on your title page).	<input type="checkbox"/> Have you indicated your choice of Open Access or Traditional Publishing?
<input type="checkbox"/> Have you included the full names of your advisor/committee chair?	<input type="checkbox"/> Have you indicated your choice regarding third-party sales?
<input type="checkbox"/> Have you indicated the appropriate subject category on the submission form?	<input type="checkbox"/> Have you indicated any necessary embargo or restriction?
<input type="checkbox"/> Have you attached a copy of your abstract and title page to the Submission Form? These must be identical to the abstract and title page in your manuscript.	<input type="checkbox"/> Have you attached permission letters for materials under another copyright attached? Do they state that the materials may be included in the published version of your work?
<input type="checkbox"/> Have you substituted words for formulas, symbols, and abbreviations in the title? Are accents included?	<input type="checkbox"/> If you choose to have us register your copyright, have you provided all necessary information on the submission form?
<input type="checkbox"/> Did you make sure your fonts are embedded?	<input type="checkbox"/> If you want personal copies, did you fill out the order form?
<input type="checkbox"/> Have you included an abstract and title page in English, if the original is in another language?	<input type="checkbox"/> Have you enclosed any payments that you will make directly to us? NOTE: please ensure that the form of payment you use will not expire in the 6 months following your submission!
<input type="checkbox"/> Are all pages of your manuscript present and appropriately numbered? (The most common problem with submissions is missing pages).	<input type="checkbox"/> Have you signed the publishing agreement in the space provided and ATTACHED PAGES 3 AND 4 TO BE SUBMITTED WITH YOUR MANUSCRIPT?

PLEASE ALLOW UP TO 16 WEEKS FOR THE RELEASE OF YOUR DISSERTATION OR THESIS

As with any scholarly publication, there is substantial lag time between submission of your manuscript and release of the published work. The actual time between submission and release can vary widely, depending on your institution's process and workflow, and the time of year. Most universities hold all submitted dissertations and theses until the end of the semester or quarter, then deliver them to us all at once. This is also true for your institution's transmission of ETD's using our online submission system.

Once your manuscript actually arrives at UMI, another 6 to 10 weeks can pass before its release. While there is no peer review process on our end (your committee serves the same purpose prior to submission), our editorial, bibliographic, reproduction and archiving processes all require individual attention to each individual dissertation and thesis. We publish more than 60,000 graduate works each year (72,000 in 2006), and most of them arrive at UMI between the middle of May and the end of June. While most submissions are processed without complication, approximately 20% on average are problematic. Handling problem submissions slows down the process for an entire cohort.

You can increase the chances of a speedy publishing process by following all instructions, guidelines, and requirements precisely. Use the Submission Checklist above. And if you have any questions, call our Author Relations Team at 1. 800. 521. 0600 x.7020.
